WORK EXPERIENCE

Process Engineer (VIE program)

November 2017 – Present

Saint-Gobain, Faribault, Minnesota (USA)

- Manage projects to improve the KPIs of the production line. For example, mixing tubes cleaning project highlights:
 1. \$200,000/year savings in downtime.
 2. \$8,000/year savings in labor cost.
 3. Improved safety and morale of the team.
- Develop and document new standard operating procedures (SOPs).
- Support production: react to 'fire calls' when equipment is down, troubleshoot, train operators, provide training documents, implement process improvement based on feedback.
- Perform data analysis and root-cause investigations.

SUMMARY

Industrial Engineer focused on Production with a Master's in Business Administration and more than three years of experience in manufacturing in worldwide companies. Currently working at a Saint-Gobain company, SageGlass, in Minnesota, USA as a Process Engineer in a multicultural, dynamic setting.
